Report of MVP v.2 analize	
Description	Results
In the process of verification of the developed version of the MVP v.2 (minimum viable product) for compliance with the customer's requirements, it was determined that some of the functions have not yet been implemented. Also, not all implemented functions fully described in actual customer's requirements. Some implemented functions were not specified in the requirements. Portal did not pass the localization test. "Our services" functions are not yet implemented. Check out and payment functions are not fully implemented. Navigation and usability of portal is not absolutely user friendly (UI needs some editions).	About 80% of the functionality stated in the requirements has been implemented
