Report of MVP analize

Description	Results
In the process of verification of the developed version of the MVP (minimum viable product) for compliance with the customer's requirements, which were agreed during the first sprint, it was determined that some of the functions have not yet been implemented. Also, not all implemented functions fully meet the customer's requirements. Some implemented functions were not specified in the requirements. Portal did not pass the localization test.	Only 55.8% of the functionality stated in the requirements has been implemented
